

Peri Naga Venkata Sai Manoj

LinkedIn: www.linkedin.com/in/manojperi26
Github: <https://github.com/manojperi26/>

Email: manojperi26@gmail.com
Mobile: +91 8885772647

SKILLS

Languages: Python, C++, Java, SQL
Frameworks: PyTorch, TensorFlow, Keras, scikit-learn, LangChain, Flask, FastAPI, OpenCV
Tools/Platforms: MySQL, Git, Github, VS Code, PowerBI
Core Concepts: Data Structures & Algorithms, OOPs, Operating Systems, Machine Learning, Deep Learning, RAG, NLP
Soft Skills: Problem-Solving, Teamwork, Communication, Adaptability

EXPERIENCE

Software Intern | Endeavour Technologies (Offer Letter) Jun'26 - Aug'26

- Researched and preprocessed data for ML model development, contributing to model design decisions.
- Trained, evaluated, and debugged machine learning models; documented technical processes and issue resolutions.
- Collaborated with the team to deliver AI-driven solutions end-to-end.

PROJECTS

Data Whisperer | Python, Streamlit, LangChain, Groq (Llama 3.3 70B) Aug'26

- Built a Streamlit-based CSV data-analysis agent using LangChain's ReAct framework, enabling natural-language querying.
- Integrated Groq-hosted Llama 3.3 70B to interpret user queries and auto-generate charts/insights in real time (91% accuracy).
- Debugged agent iteration-limit failures and chart-rendering errors, improving end-to-end query reliability.

Alzheimer's Detection System | Python, TensorFlow/Keras, VGG16, Streamlit Mar'26

- Engineered a 4-class Alzheimer's MRI classifier for automated early-stage disease detection, leveraging VGG16 transfer learning.
- Preprocessed and augmented medical imaging data across all 4 disease stages, deployed as interactive Streamlit web app.
- Achieved 97.89% classification accuracy across all four disease stages, validating reliability for diagnosis support.

Walmart Sales Forecasting | Python, Random Forest, Scikit-learn Feb'26

- Investigated 6,435 retail records across 45 stores to uncover seasonal trends and economic factors driving weekly sales.
- Constructed a Random Forest regression model to generate 12-week sales forecasts, enabling data-driven inventory planning.
- Delivered 93% prediction accuracy ($R^2 = 0.93$) on weekly sales forecasts, supporting reliable demand planning decisions.

TRAINING

Professional Certification in AI & Data Science Feb'25 - Jun'26
Intellipaath (in collaboration with IIT Indore)

- Established foundation in statistics, EDA, and applied ML (XGBoost, SHAP, forecasting) using AI-assisted coding, SQL & Python.
- Implemented Deep Learning with PyTorch & Transformers; applied Generative AI, LLM, and RAG concepts to hands-on exercises.
- Executed real-world industry projects, deploying ML models via cloud MLOps and performing data analysis with Power BI.

COURSES & CERTIFICATES

AI Engineer Launchpad: Mastering LLMs and Agentic AI | Lovely Professional University Aug'26
DRISHTI CPS - AI & Data Science Certification, IIT Indore | Intellipaath Jun'26
Python | Intellipaath Mar'26
SQL | Intellipaath Sep'25

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering Aug'24 - Present

Matrusri Junior College Rajahmundry, AP
Intermediate - MPC (Percentage: 86.8%) Mar'22 - May'24

Sri Chaitanya EM Techno School Visakhapatnam, AP
Matriculation (Percentage: 94.7%) Mar'21 - May'22
